

ASSETS IN MOTION

Executive Summary: Are your assets ready for disposition?

About Us

Assets In Motion is a privately held company of real estate professionals currently providing comprehensive real estate management services to lending and funding institutions across the country. Our sole focus is evaluating the institution's portfolio of other real estate owned (REO) with particular emphasis on real estate projects under development and undeveloped land.

Having worked closely with major investors, capital sources and financial institutions, our principals and staff have extensive backgrounds in master land planning and development in the areas of **Residential**, **Commercial**, and **Resort** real estate.

Our Mission

With years of experience under our belts, the professionals at Assets In Motion bring some of the most solid skills in the industry to every property we're associated with, and a multi-tiered approach that includes *both evaluation and disposition; respecting overhead cost constraints with a conservative and transparent fee structure.*

Whatever your objective, you'll need a proven organization capable of efficiently managing a wide array of real estate industry functional area experts. And you'll benefit from insights that only come from professionals who know the inner workings of brokerage, lending, development, construction and receivership.

Following a thorough assessment of the current condition and value of your asset or asset portfolio, our goal is maximizing value via asset stabilization, project completion, potential market repositioning, and/or disposition via proven national and international sales and marketing mediums.

Our Approach

Once an institution's strategic, operational and financial goals are defined, the primary objective of Assets In Motion is to provide value-added services to non-performing real estate.

Our case studies highlight how we have demonstrated success for residential, commercial, retail, industrial, medical, resort, maritime and aviation projects through the following process:

PHASE I: *Evaluation*

Assessing the highest and best use of property

- Management of Real Estate Assets, Including Receivership Property Management
- Entitlement Procurement
- Subdivision & PUD Development Services
- Land Planning, Hospitality & Design Coordination
- Project Estimates & Construction Completion
- Determining Maximum Value Recovery & Disposition Options, with Action Plans, for Real Estate Assets

PHASE II: *Disposition*

Marketing and continued asset management

- Access to Buyers: Effective, Reliable Capital, Including High Net Worth Individual and Fund Solutions
- Extensive Built-In Brokerage Network Across the United States
- Strategic Partnerships with Worldwide Brokerage Networks

Residential development already a ghost town due to insufficient investor dollars.

Our Team

No matter where the real estate within your portfolio is located, our team of real estate professionals with 200+ cumulative years in the business of portfolio management will put the right people in the right place to manage your project.
